***FOUNDER***

## *BUILDING LIVES, NOT JUST PROJECTS*

Since 2005, I have walked alongside Sri Lanka's most underserved communities, witnessing how the lack of safe water, sanitation, and basic facilities steals dignity and opportunity and how simple, well-planned solutions can restore hope. In 2025, we mark 20 years of service, reaching 730,291 people through 339 projects, supporting schoolchildren, women, girls, Tamil estate and Muslim communities, as well as elderly and disabled people.

During a working visit amid Cyclone Ditwah, I saw homes destroyed and livelihoods lost, yet dignity and resilience standing strong. This moment reaffirmed why Kansarmen exists: development must go beyond construction. As we move forward, we remain committed to community-led, sustainable solutions that protect dignity and ensure every child has a fair chance to learn, grow, and dream.

# Chaminda Fernandopulle

***EXECUTIVE DIRECTOR***

## *BUILDING LIVES, NOT JUST PROJECTS*

Twenty years ago, Kansarmen began with a simple belief: serve communities with respect, consistency, and heart. By the end of 2025, that belief has grown into 339 projects, reaching more than 730,000 people across Sri Lanka.

This year, we completed 24 WASH projects and, for the first time, worked in all provinces, including the Eastern Province; an important milestone for our journey. During Cyclone Ditwah, while much of the country struggled, our team stepped in quietly to help over 100 affected families, clean flooded homes and drinking water wells. The number may seem small, but the impact was deep families returned home sooner, avoided camps, and rebuilt with dignity.

What we do is not just about infrastructure. It is about standing where others do not, listening to communities, and helping life move forward; one household, one school, one future at a time.

# ABOUT US

Since 2005, Kansarmen SL Foundation has quietly stood beside some of the most underserved schools and communities in Sri Lanka. In many rural areas, children walk long distances to school, often without safe drinking water, proper sanitation, or basic hygiene facilities.

We believe that water is not a privilege it is a human right. A simple tap, a safe toilet, or clean water can protect health, restore dignity, and keep children in school.

Working closely with communities, we create practical and sustainable water, sanitation, and hygiene (WASH) solutions that respond to real needs and local realities. Every project is designed not only to provide infrastructure, but to strengthen resilience, protect health, and support education.

For us, success is not measured only by systems built, but by children learning in dignity, healthier communities, and futures that remain open because basic needs are met.

## Vision

**The Sri Lanka where everybody has sustained water supply, with enhanced sanitation and hygiene in the face of climate change.**

## Mission

**To transform lives by improving access to safe water, hygiene and sanitation for the communities in Sri Lanka.**

## Objectives

- **Ensure Access to Safe Water and Improved Sanitation.**
- **Promote Hygiene Education and Practices**
- **Enhance Community Health**
- **Support Educational Institutions**
- **Conserve Water Sources and the Environment**

## Core Values

- **Sustainability**
- **Equity**
- **Community Engagement**
- **Resilience**
- **Collaboration**

# OUR APPROACH TO SUSTAINABILITY WASH

At Kansarmen SL Foundation, we deliver lasting water, sanitation, and hygiene solutions by combining community engagement, technical expertise, and sustainability. Every project strengthens health, dignity, and education while empowering local communities.

## Community-Centered Development

Projects begin with community requests from schools, local authorities, or organizations. Through field visits and discussions, we assess urgent needs, available resources, and volunteer support. Communities are involved from planning to implementation, ensuring ownership and relevance.

## Sanitation, Hygiene & Public Health

Kansarmen builds durable, gender-sensitive sanitation facilities with menstrual hygiene management. Hygiene and health awareness programs are delivered through school sessions, art, drama, and community engagement, promoting healthy behavior and long-term impact.

## Safe Water Infrastructure & Climate-Resilient Systems

We provide reliable, context-appropriate water systems including wells, pipelines, storage tanks, water towers, gravity-fed or solar-powered systems, and rainwater harvesting. Water quality, availability, and seasonal risks are assessed, and filtration or treatment is added when needed.

## Sustainability, Environmental Stewardship & Community Ownership

Every project forms a local Sustainability Committee of school leaders, teachers, students, and parents trained to manage and maintain facilities. Environmental measures like tree planting, spring protection, and watershed management safeguard resources and strengthen climate resilience.

# WHAT MAKE US DIFFERENT

We go to the corners of Sri Lanka that others cannot reach villages where children drink unsafe water, where schools have broken toilets, where families live with daily struggle. We don't count beneficiaries; we count lives changed.

From the first conversation to the last brick laid, the community is part of the process. Their ideas, labor, and decisions shape every project. They learn to maintain the facilities themselves, understanding every pipe, tap, and tank. This is ownership, responsibility, and dignity.

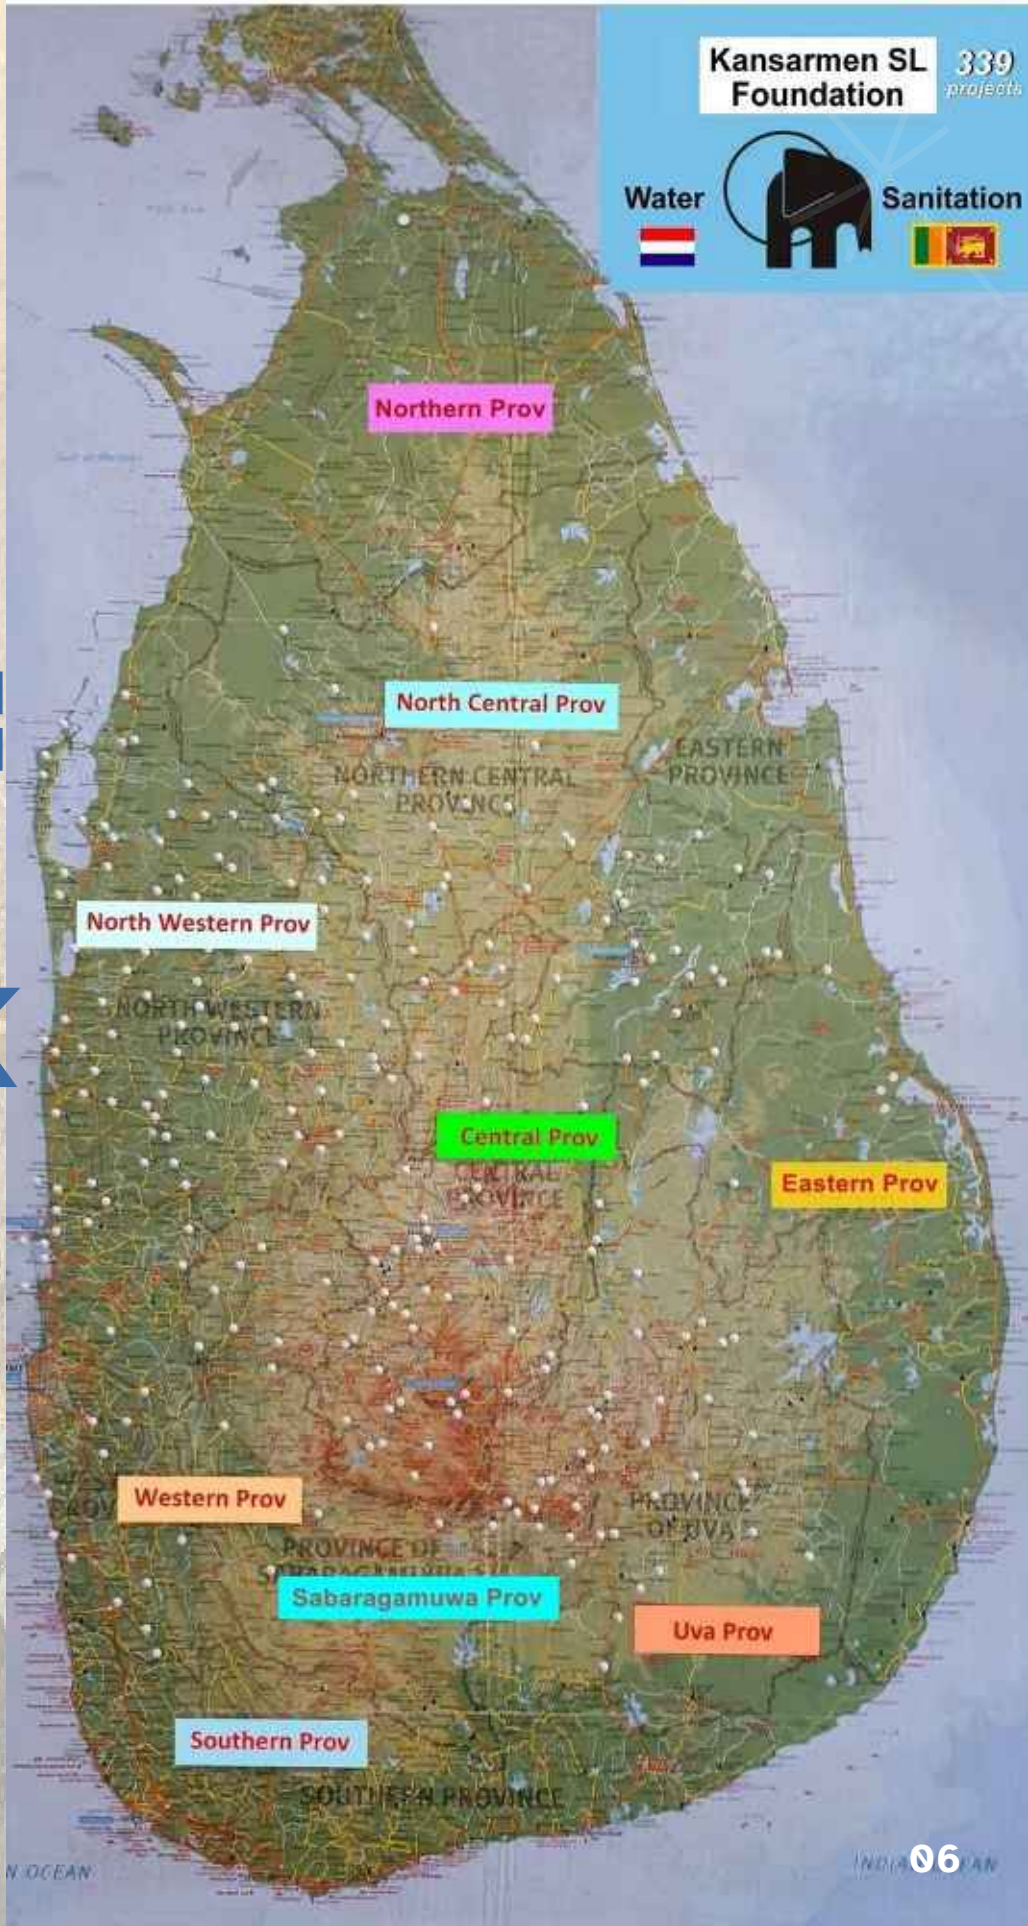

Our construction team is at the heart of this work. Paid and managed by us, they are often drawn from the communities we serve; many were once children who benefited from our projects. They know the mosquitoes, elephants, and nights spent sleeping on floors. They work tirelessly, ensuring every project is practical, high-quality, and lasting.

We build gender-sensitive washrooms, use natural water sources, conserve catchment areas, and rely on gravity-fed systems and practical engineering techniques. We don't just hand over fancy facilities that children cannot use; we give basic, functional water and sanitation solutions, and train the community to maintain them. Villagers contribute labor, ideas, and decisions, taking ownership and pride.

We don't just provide taps or toilets; we give dignity, empowerment, knowledge, and hope, to communities the world often forgets.

# WHERE WE WORK

## 339 completed projects in Sri Lanka to 730.000 persons direct / indirect

# 2025 IMPACT

## What Changed Because We Were There

Every project, every session, every drop of clean water created a ripple of change in lives and communities.

### Safe Water and Sanitation

*"Now I don't have to walk miles for water. I can wash my hands before school!"*

- Students, rural villagers
- Gender Sensitive Washrooms

**21**
**PROJECTS**

### RO Filtration System

*"Now, we can drink straight from the tap. I don't have to bring water from home anymore."*

- RO Plants installed in 2 schools and 1 community

**1,143**
**PEOPLE**

### WASH Awareness and Training

*"Our teachers teach us how to keep our washrooms clean. And we now understand why hygiene matters"*

- PHIs train on WAHS Awareness
- RO Filters Maintenance Trainings

**2,720**
**STUDENTS**

### Environmental and Water Conservation

*"We planted 300 Mee, Kumbuk and fruit saplings to keep our water sources safe for everyone"*

- 1 Project in Puttalam and Kurunagala Districts
- Catchment Conservation

# 2025
# Safe Water & Sanitation Facilities Provided

# 437_RAMBODAGAMA SCHOOL

Rambodagama Primary School serves a remote, low-income community in Nuwara Eliya with 80 students and seven teachers. For years, the school relied on a broken 30-year-old water system, and the only well dried up during the dry season, leaving the school and 250 families without clean water. We enhanced a natural water developed, conserved it and laid a 1,380 m pipeline from the source to the school and premises, repaired washrooms, replaced pipes and taps, built two handwashing units, installed new water tanks with concrete bases, fixed existing tanks, and added a water motor with protective fencing. Parents, teachers, and students supported the work. The project directly benefits 80 students and over 1,100 community members.

# 458_ UPPALAWATTA SCHOOL

Uppalawatta School in Puttalam serves 234 students and 20 teachers from low-income families. For over ten years, the school lacked a reliable and safe water source, forcing students and teachers to bring water from home and leaving washrooms unusable, especially for girls. Kansarmen SL Foundation, together with the Foundation of Goodness, installed a 15 ft tube well with a solar pump, laid pipelines, renovated washrooms, repaired tanks, added handwashing units, and built three new tap posts. Parents supported the work through labor and transport. The project directly benefits 254 people and over 300 community members indirectly.

# 468_ KAIPUGALA TAMIL SCHOOL

Kaipugala Tamil School in Punduloya serves 220 students and 16 teachers from estate laborer and daily-wage families. Due to hilly terrain and scattered settlements, the school relied on an unsafe and unstable water source, leaving washrooms and handwashing units without enough water and affecting students' health, especially girls. We stabilized the water source with concrete rings, improved natural filtration, laid pipelines to the school, reconstructed three tap posts, upgraded seven handwashing units, restored water to four washrooms, and installed three new tap posts. Parents supported the work through digging and labor. Over 350 people now benefit.

# 469_KALAPUWANAM TAMIL SCHOOL

Kalapuwanam Tamil Maha Vidyalayam in Meddekumbura serves 263 students, 14 teachers, and 36 nearby families who depend on the school for water. For years, limited access to safe water affected drinking, sanitation, and daily learning. We developed a natural water source in the tea estate, built a small dam, installed concrete rings for filtration, laid a 500 m pipeline, and set up a 2,000L tank while replacing three old tanks. A water motor and electrical connection now pump water 60 m uphill to the school. Washrooms, handwashing units, and tap posts were renovated. Parents and the estate supported trenching and access.

# 470_ HADUNUWEWA SCHOOL

Hadunuwewa Central College in Kothmale serves 646 students and 48 teachers from estate families with limited access to basic services. For years, a 28-year-old broken water system left the school without reliable water, affecting hygiene, learning, and girls' dignity. We renovated existing tanks, built three new foundations, and laid an 800 m pipeline connecting all washrooms, taps, and handwashing units. Three new handwashing units and a tap post were added, while five existing units were fully restored. Parents supported digging and material transport. The project now benefits 763 people directly and over 5,000 indirectly.

# 484_MAHAVELI SCHOOL

Mahaweli Primary School in Beramanna Village serves 146 students and seven teachers from farming and daily-wage families. Although the school had a well, the lack of pumping, storage, and proper distribution left children without reliable water for drinking, handwashing, or sanitation. We installed a reinforced concrete tank stand, a 2,000 L tank with protective fencing, and laid a 50 m pipeline connecting washrooms and three handwashing units. Damaged taps and pipelines were replaced, restoring safe daily access to water. Parents, teachers, and students supported the work through labor and transport, directly benefiting 153 people.

# 486_ NUGEDOLAWATTA COMMUNITY

Kansarmen SL Foundation, together with Care Climb, Stichting Kansarmen Sri Lanka, and local stakeholders, implemented a sanitation program in Nugedolawaththa for resettled families and the village school. We constructed two fully functional household washrooms, each with toilet pits, secure walls and roofing, plastering, pipelines, and internal fittings to ensure safe water flow and hygiene. Families who previously practiced open defecation now have private and dignified sanitation. Two beneficiary families supported pit digging, site preparation, and labor, strengthening ownership and sustainability.

# 488_THORANAKADA DARMARAJA SCHOOL

Thoranakada Darmaraja School in Ratnapura serves 250 students, 23 teachers, and eight children in a special needs unit from working-class families. The school relied on a distant spring contaminated with E. coli, leaving broken taps and unsafe wash facilities. We cleaned and protected the spring, newly given an iron water tank stand and installed three 500 L tanks, and laid 1,030 m of underground pipelines. Washrooms and handwashing units were fully renovated, restoring safe and reliable water across the school. Parents contributed voluntary labor, strengthening ownership. The project directly benefits 281 people, with 300+ indirect beneficiaries.

# 490_ELADALUWA TAMIL SCHOOL

Eladaluwa Tamil Vidyalaya in Hali-Ela serves 44 students and 8 teachers from marginalized Tamil tea estate families. The school had no accessible water, and unsafe sanitation affected health, attendance, and girls' dignity. We installed three concrete rings, cleaned and extended pipelines, added a 5,000 L tank with protective base, and built an extra 1,000 L tank, 4 handwashing units, 4 washrooms, and 2 new tap posts. Estate families helped with labor and transport. The project directly benefits 52 people, with 200+ indirect beneficiaries.

# 507_SILVESTER SCHOOL

Silvester Sinhala School in Negombo serves 64 students and 10 teachers from fishing and daily-wage laborer families. The school lacked a proper water distribution system, leaving children without reliable access to handwashing and sanitation. We constructed three new handwashing units, renovated one existing unit, built three new tap posts, installed a new water motor and 2,000L tank on an iron stand, and renovated two washrooms with full internal pipelines. Parents helped with transport and labor. The project directly benefits 64 students and 10 teachers, with 150+ indirect beneficiaries.

# 509_VALAIPPADU TAMIL SCHOOL

KN/Valaippadu Roman Catholic Tamil School, supported by Kansarmen SL Foundation and World Vision, serves students from a community facing long-standing water scarcity. We renovated the main well, upgraded the pump house and electrical panel, installed and repaired multiple water tanks, built two new handwashing units, nine tap posts, and supplied water pipelines to washrooms and a urinal. Parents and community members contributed labor and transport. The project directly benefits 244 students, with 1,800 indirect beneficiaries, ensuring safe and reliable water and sanitation for the school community.

# 511_ WEWALDENIYA SCHOOL

Wewaldeniya School, serving a rural community of daily-wage families, lacked reliable water during the four-month dry season. Kansarmen SL Foundation installed a 5,000L tank on a reinforced base, renovated washrooms and urinals, repaired walls, replaced pipelines and taps, upgraded handwashing units, laid and concreted 350m of pipelines, and rehabilitated the well with a new submersible pump. Parents and community members contributed labor and transport. The project directly benefits 283 students and over 400 indirect beneficiaries, ensuring safe water and sanitation for the school community.

# 512_ ISIPATHANA SCHOOL

Isipathana School, in Thennuge Village, Badulla, lacked reliable water for students and teachers, who previously carried water from home or relied on a distant community source. Kansarmen SL Foundation built a protected well, laid 650 m of pipelines, repaired and expanded the school's network, reconstructed tanks and sinks, extended supply to the nursery, and added a community tap. Parents and community members helped with digging, transport, and labor, while students received hygiene training from the MOH. The project directly benefits 151 students and 12 teachers, with 180+ indirect beneficiaries.

# 514_KURIGNGNAMPITIYA SCHOOL

Kurigngnampitiya Roman Catholic Sinhala School, in Kalpitiya, faced unsafe drinking water and broken washrooms, forcing students to carry water from home. Kansarmen SL Foundation, together with World Vision Lanka, rebuilt male and female washrooms with toilets, urinals, and MHM systems, reconstructed handwashing units, upgraded pipelines and tanks, and installed an RO plant for safe drinking water. Parents contributed labor, and a Sustainability Committee now oversees the facilities. The project benefits 446 students and teachers directly, with over 700 community members indirectly.

# 517_ VEERAPURAM TAMIL SCHOOL

Kurigngnampitiya Roman Catholic Sinhala Vidyalaya, in Kalpitiya, faced unsafe drinking water and broken washrooms, forcing students to carry water from home. Kansarmen SL Foundation, together with World Vision Lanka, rebuilt male and female washrooms with toilets, urinals, and MHM systems, reconstructed handwashing units, upgraded pipelines and tanks, and installed an RO plant for safe drinking water. Parents contributed labor, and a Sustainability Committee now oversees the facilities. The project benefits 446 students and teachers directly, with over 700 community members indirectly.

# 524_ THONIGALA CULTURAL CENTER

Thinogala Cultural Centre, in Anamaduwa, lacked proper water and sanitation for nearly five years. Kansarmen SL Foundation restored the external washroom, repaired walls, doors, and frames, added new concrete surroundings, repainted, installed two commodes inside the main washroom, repaired pipelines, and reconnected two 1,000 L tanks. Parents and villagers helped with labor, transport, and maintenance. The project benefits 180 children daily and over 1,000 children and community members throughout the year.

# 525_ DEEPALOKA SCHOOL

Deepaloka School, in Beramanna, faced serious water and sanitation challenges. Kansarmen SL Foundation improved the school's water supply and sanitation by building concrete bases and installing a 2,000 L main tank, two 1,000 L tanks for boys' and teachers' washrooms, a 500 L tank for the special needs unit, and a 250 L support tank. A 200 m pipeline network was laid underground, washroom slabs cleaned, damaged pipes replaced, three latrines reconnected, and handwashing sinks upgraded. Parents and community members helped with transport, digging, and labor. The project benefits 553 people (518 students and 35 teachers).

# 527_ KATUNAYAKE SCHOOL

Katunayake Maha Vidyalaya, in Katunayake, is one of Sri Lanka's oldest schools, dating back to 1811. Kansarmen SL Foundation restored safe water access and upgraded sanitation by rebuilding male and female washrooms with toilets, showers, taps, and a menstrual hygiene management system. Roofs, plumbing, and painting were completed, and total 678m underground pipelines were given newly. A tube well, motor, and 2,000 L tanks were repaired. Handwashing facilities were upgraded with 15 taps, connected to the vegetable garden and special needs unit. Teachers, parents, and students formed a Sustainability Committee to maintain the facilities.

# 529_ IHALAGALAGAMA SCHOOL

Ihalagalagama School, in the Balangoda Education Zone of Ratnapura, serves 84 students from low-income farming and daily-wage families. For years, broken sanitation facilities and an unreliable water system left children, especially girls, without safe or dignified washrooms. Identified by the University of Sabaragamuwa as urgently in need, Kansarmen SL Foundation constructed a new gender-appropriate washroom block with commodes, urinals, internal handwashing facilities, and a dedicated shower room. A new pipeline system with taps and showers was installed, alongside upgraded drainage and plumbing to ensure long-term functionality. Parents supported the work through transport and labor, strengthening community ownership.

# 2025
# RO Filter Systems Provided

# 541_ KURIGNGNAMPITIYA RO PLANT

With full funding from World Vision Lanka, Kansarmen SL Foundation implemented a Reverse Osmosis (RO) drinking water system at Kurigngnampitiya Roman Catholic Sinhala Vidyalaya to address long-standing water quality issues caused by brackish groundwater. Alongside installation, hands-on operation and maintenance training was conducted for the school principal, four teachers, four parents, and four students to ensure sustainability. The RO plant now provides safe drinking water to 635 students and teachers directly and benefits nearly 1,000 community members indirectly, including parents and visitors using the school facilities.

# 554_ RIDEEGAMA RO PLANT

The Rideegama Nagollagama Community RO Water Project was implemented to improve access to safe drinking water for families affected by contaminated water sources and waterborne illnesses. With financial support from World Vision Lanka. Kansarmen SL Foundation installed a 5,000-liter-per-day Reverse Osmosis (RO) water purification plant for the community. The project also included training for the local management committee on operation, maintenance, and sustainability of the system. Today, the project benefits 450 individuals by providing reliable access to purified drinking water and supporting improved community health.

KANSARMEN SL FOUNDATION

# 2025 WASH Awareness & Training Provided

# 542_ DUNGALPITIYA SCHOOL AWARENESS PROGRAM

Dungalpitiya Junior Secondary School, in the Negombo zone, required stronger hygiene awareness and community engagement beyond physical WASH facilities. Kansarmen SL Foundation conducted a two-day holistic awareness program combining WASH education by Public Health Inspectors, drug-prevention sessions by the National Dangerous Drugs Control Board, and guidance on social responsibility from the Sri Lanka Police. An eye clinic, healthy food activities, an art competition, and a community kitchen strengthened learning and unity while celebrating Children's Day 2025. Fully funded by Adoptie Sri Lanka (Belgium), the program directly benefited 116 students, with wider impact across families and the school community.

# 2025
# Environmental and Water Conservation

# 537_ WORLD ENVIRONMENTAL DAY CELEBRATION

To mark World Environment Day, Kansarmen SL Foundation, with the University of Kelaniya, led an environmental restoration initiative in Puttalam District and Jayasirigama, areas facing growing water stress. Three hundred trees were planted, including Kumbuk and Mee to protect water sources, improve soil retention, and strengthen ecosystems, alongside Ehela, Apple Masan, and Guava to enhance urban green spaces. At Higure Wewa, 30 Kumbuk trees were planted around the lake to safeguard the catchment and reduce evaporation. Parents, students, the Sri Lanka Army, government officers, and NGOs joined hands in this effort, collectively benefiting over 5,000 people through improved environmental resilience.

KANSARMEN SL FOUNDATION

# 2025
# Community Kitchen

# 542_ COMMUNITY KITCHEN

What began as simple refreshments during WASH facility openings slowly revealed a deeper concern; many rural children were not receiving three proper meals a day. Responding to this, we organized a Community Kitchen program at Dungalpitiya School alongside our awareness sessions.

Grade 5 and 6 students, supported by a few parents, hygienically prepared healthy sandwiches for their peers and visiting students from Kapungoda School. Each child received two sandwiches, a boiled egg, and fresh lime juice. On another day, we served a nutritious lunch prepared with community support.

The joy was unforgettable; no food wasted, hands washed without reminders, older students serving younger ones first. For some children, it was their first complete meal of its kind.

# 2025
# Art As Advocacy

# ART AS ADVOCACY

Launched in 2024 alongside new WASH facility openings, Art as Advocacy transforms creativity into awareness. Schools host art competitions and exhibitions where students design posters on water, hygiene, and dignity. Performances; drama, song, dance, and speeches carry powerful WASH messages beyond the classroom into the community and social media platforms.

This year, programs were successfully held at Thoranakada Darmaraja, St. Silvester's, Wewaldeniya, Isipathana, Katunayake, Ihalagalagama, and Dungalpitiya schools. Beyond advocacy, the initiative empowers children: 3–5 underprivileged students sharing strong messages through art receive school essentials such as shoes and bags.

Here, talent becomes voice, and creativity becomes change.

KANSARMEN SL FOUNDATION

# 2025 Ditwah Emergency Support

# 558_ DITWAH CYCLONE EMERGENCY SUPPORT

In December 2025, Cyclone DITWAH devastated communities across Sri Lanka, flooding homes, contaminating wells, and collapsing essential services. Kansarmen SL Foundation, with Adoptie Sri Lanka–Belgium, responded beyond emergency relief by restoring livable homes and safe water sources. Our team worked shoulder to shoulder with affected families, even while personally impacted, cleaning mud-filled houses and rehabilitating wells using specialized WASH expertise and equipment. Through this effort, 87 families with 348 individuals returned home with dignity, safety, and renewed hope.

# Our Development & Corporate Partners

In 2025, Kansarmen SL Foundation's work was made possible through the trust, commitment, and generosity of our Development and Corporate Partners. Their financial support, technical expertise, and shared belief in sustainable impact enabled us to expand access to safe water, sanitation, hygiene education, and community well-being across Sri Lanka.

We extend our sincere appreciation to Stichting Kansarmen Sri Lanka, Wilde Ganzen, World Vision Lanka, Adoptie Sri Lanka (Belgium), LEADS, Foundation of Goodness, and Care Climb for their vital funding partnerships.

We also gratefully acknowledge Anton PVC, INSEE Cement and Brandix for their corporate collaboration and in-kind support. Our academic partnerships with CCS - University of Kelaniya and Sipsewana Unit – Sabaragamuwa University further strengthened project quality, research, and community engagement.

Together, these partnerships transformed resources into lasting change.

# Community, Government & Institutional Collaboration

Kansarmen SL Foundation's work is built on strong partnerships with communities and institutions. We coordinate closely with school principals, Grama Niladharis, and village and religious leaders to ensure smooth implementation and community ownership. Approvals and guidance are sought from Zonal Education Offices, Divisional and District Secretariats, while quarterly action plans and progress reports maintain transparency and accountability.

Health partnerships with the MOH, PHIs, and midwives strengthen our WASH awareness programs, and technical support from government TOs ensures quality infrastructure. Academic collaborations with the Universities of Kelaniya and Sabaragamuwa provide research, guidance, and innovation. Together, these collaborations ensure every project is community-led, technically sound, and sustainable, fostering long-term impact.

# Our People & Leadership

## Jan Van Der Steen

**Founder**

A Dutch civil engineer with expertise in WASH facility construction, passionate about social work, and committed to improving water and sanitation for underserved communities in Sri Lanka

## K. P. Gnananapala

**Chairman - Board of Directors**

A dedicated leader ensuring strategic growth, leveraging expertise in health and community well-being.

## Niluka Palandagama

**Secretory - Board of Directors**

Committed to education and youth empowerment, strengthening Kansarmen's impact on future generations.

## Gayan Silva

**Treasurer - Board of Directors**

Brings governance expertise, ensuring compliance, transparency, and efficiency in organizational operations.

## Konpola Sugatha Thero

**Member - Board of Directors**

Guides ethical and humanitarian values, fostering spiritual well-being and moral integrity in initiatives.

## Rev. SR. Mary Beatrice Fernando

**Member - Board of Directors**

Advocates for compassion and social justice, promoting inclusivity and care for vulnerable communities.

# Our People & Leadership

## Chaminda Fernandopulle

**Executive Director**

A visionary leader with 20 years of experience in WASH projects, known for his strong leadership, empathy, and dedication to uplifting underprivileged communities.

## Chethana Janani

**Manager Operations**

Oversees all activities, liaises with partners and stakeholders, ensuring projects run efficiently while driving KSLF's strategic growth and impact.

## Priyantha Fernandopulle

**Admin and Finance Officer**

The backbone of finance and administration, efficiently handling accounting, budgeting, and organizational management to ensure smooth operations.

## Nayani Perera

**Program Officer**

Leads grant writing, social media, and supports operations, playing a crucial role in raising awareness and securing funding for KSLF's mission.

## Aravinda Karunarathna

**Charted Civil Engineer | Advisor | Consultant**

Taking the engineering, technical and expertise knowlege on the constructions we do in the WASH facilities. Checking the BOQs, doing the feacibility studies and technically assisting the projects we do in the ground

## Nalin Jayathilaka

**Senior Field Supervisor**

Directly manage project execution, ensuring high-quality WASH facility construction with hands-on guidance from the Executive Director.

# Development Timeline

## 2027

### Institutionalizing WASH Awareness & Capacity Building

Establish structured WASH awareness and training programs in partnership with Public Health Inspectors, ensuring every completed project includes mandatory community education and behavior change components.

## 2030

### Digital Transformation of Data & Monitoring Systems

Implement fully digitized data collection, monitoring, and reporting systems to improve accessibility, transparency, real-time decision-making, and long-term impact tracking across all projects.

## 2033

### Strengthening Local Fundraising & Strategic Partnerships

Increase locally generated funding and partnerships to 60% by expanding corporate collaborations, community-driven fundraising, and long-term strategic alliances to ensure financial sustainability.

## 2035

### Driving Innovation & Climate-Resilient WASH Solutions

Introduce climate-resilient water systems, wastewater reuse models, and innovative technologies to address water scarcity, ensuring long-term sustainability under changing environmental conditions.

**INDEPENDENT AUDITOR'S REPORT**

**TO THE MEMBERS OF KANSARMEN SL FOUNDATION**

**Report on the Financial Statements**

We have audited the accompanying financial statements of Kansarmen SL Foundation, which comprise the statement of financial positions as at December 31, 2025, and the related statements of Income & Expenditure, Receipt & Payment for the year then ended together with the notes.

***Management's Responsibility for the Financial Statements***

Management is responsible for the preparation and fair presentation of these financial statements in accordance with Sri Lanka Accounting Standards. This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

***Scope of Audit and Basis of Opinion***

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Sri Lanka Auditing Standards. Those standards require that we plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

We have obtained all the information and explanations, which to the best of our knowledge and belief were necessary for the purposes of our audit. We therefore believe that our audit provides a reasonable basis for our opinion.

***Opinion***

In our opinion, so far as appears from our examination, the Foundation maintained proper accounting records for the year ended December 31, 2025 and the financial statements give a true and fair view of the Foundation state of affairs as at December 31, 2025 and its Income over Expenditure for the year then ended in accordance with Sri Lanka Accounting Standards.

***Report on Other Legal and Regulatory Requirements***

These financial statements also comply with the requirements of Section 151(2) of the Companies Act No. 07 of 2007.

**S & A Associates**
